Durlon 7910

Aramid with NBR Rubber Binder
Compressed Asbestos Free Gasket Material
ASTM F104: F712120-A9B3E22K5L151M5

Durlon® 7910 is a good quality commercial grade compressed sheet gasket material for moderate service conditions. It was specifically developed to meet the requirement of NSF/ANSI 61 for potable water application at both 23°C and 82°C (Commercial Hot). This product is offered in cut gaskets only.

Warning: Durlon® gasket materials should never be recommended when both temperature and pressure are at the maximum listed. Properties and applications stated are typical. No applications should be undertaken by anyone without independent study and evaluation for suitability. Never use more than one gasket in one flange joint and never reuse a gasket. Improper use or gasket selection could cause property damage and/or serious injury. Data reported is a compilation of field testing, field service reports and/or in-house testing. While the utmost care has gone into publishing the information contained herein, we assume no responsibility for errors. Specifications and information contained in this flyer are subject to change without notice. This edition cancels and obsoletes all previous editions.

Anti-Stick Properties:

Much effort has gone into improving the anti-stick release agents of all compressed Durlon® products. All Durlon® compressed gasket materials have passed the MIL-G-24696B Navy Adhesion Test (366°F/48hrs).
